**IMPORTANT, RETAIN FOR FUTURE REFERENCE: READ CAREFULLY**

**OWNER'S MANUAL**

## Product Specifications:

Battery: 6V 4.5AH  
 Drive Motor: 6V 390\*1(16000RPM)  
 Suitable age: 36 months  
 Maximum weight: 30kg  
 Speed: 3-7km/h  
 Hours of Use: Using 1hours after Charging 8-12 hours  
 Charger: Input: 100V-240V 50/60HZ  
 Output: 6V 500MA  
 Remote Control Battery: AAA1.5V\*2(not provided)

## PARTS

## HARDWARE

## **Warning**

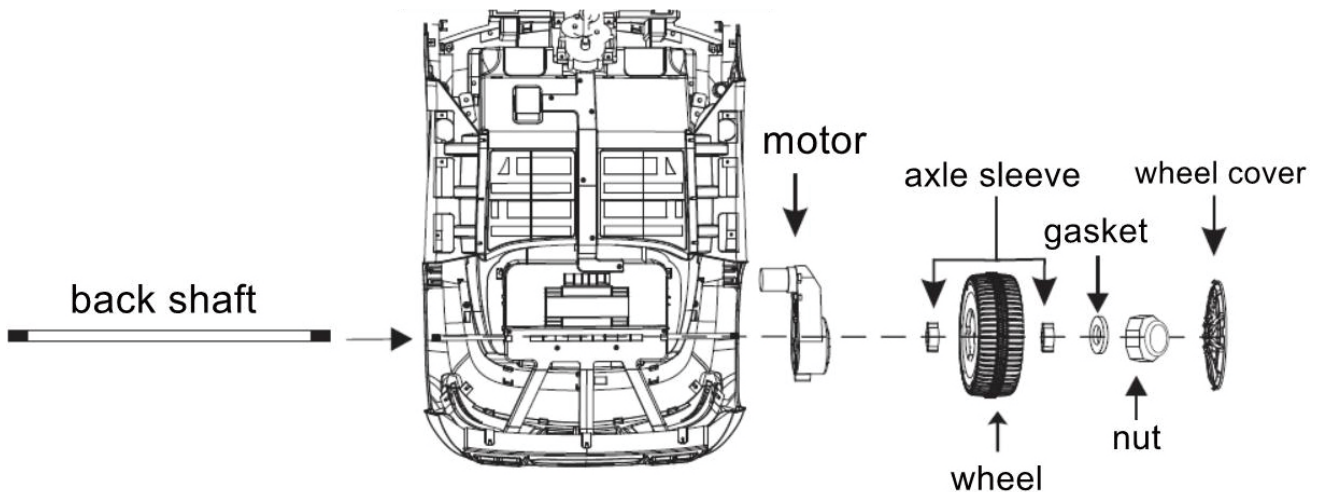

The toy should be used with caution since skill is required to avoid falls or collisions causing injury to the user or third parties.

- The vehicle must be assembled by adults, which needs about 10 minutes.
- Tools needed: a screwdriver(  prepared by yourself)  
 (2 pieces  check in the spare bags)
- Don't let children touch or play the small components so as to avoid children being choked.
- Please check the packing list before assembling. Deal with the plastic bags properly and don't let children play the bags so as to avoid them being choked.

## Assembly steps

## Driving wheel installation:

- Turn the bottom of the toy car up as above picture show.
- Put a axle sleeve and a gasket into the wheel.
- Push the wheel to the back axle and make the wheel connect well with the motor.
- Put a axle sleeve and a gasket to the other side of the wheel .
- Tighten the wheel with a M8 nut.
- Insert the Wheels cover.
- The other wheel to be installed as the same way.

## Front wheel installation:

- Turn the bottom of the toy car up as above picture show.
- First put a axle sleeve and a gasket into the wheel.
- Push the wheel to the front axle.
- Put a axle sleeve and a gasket, then tighten them with a nut.
- Insert the Wheels cover.
- The other wheel to be installed as the same way.

## Driving wheel installation

- Connect the terminal of the steering wheel to terminal of the instrument panel , put the wire back to instrument panel if they are too long.
- Make the two holes of the driving wheel connect with the holes in the instruments panel, and then tight M5 nut well with M5\*35 round nut.

## Mirror installation

- Make the slots in the mirror in the same line with the slots in car body and press the mirrors into the gaps.

## Windshield installation

- Check the slot and press the windshield according the slot location to the gap end.

## Connect the wire

- Connect the red line on the car body connect with the red line of battery.

### Note:

Pay attention to the positive and negative positions to prevent short circuit of the power supply.

## Seat installation

- Put the seat onto the car body according to above picture, and tight the seat with slots well using  $\text{Ø}4 \times 20$  self tapping screw.

## How to operate your "Ride on"

- Please tell your children and his playmates with the following safety rules and make sure they all understand.
- The car should be driven under the supervision of adults

- Ensure the power is switched off when not in use. Remove the battery connector when it has not been used for a while.
- Before using and charging, check the plug and other parts for any damage.

### **Charging:**

- Charge the battery for less than 10 hours – charging for longer can cause permanent damage.
- Place the DC plug into the power socket, then put the charger into the plug. Never use the product when charging.
- This product can be used for one hour – the charging time is 8-12 hours.
- It is normal for charger and battery to stay cool when charging.
- Do not use the connector near water to avoid damage.
- Only use the supplied charger. Using a charger not supplied by the manufacturer can damage the product.
- When not in use for a long time, charge the product.

## Troubleshooting

Problem	Cause	Solution
The car does not start.	<ul style="list-style-type: none"> <li>- The battery is low.</li> <li>- Failure to press the switch button correctly.</li> <li>- Power connector failure.</li> <li>- Battery breakdown.</li> <li>- Electrical devices are damaged.</li> <li>- Generator is faulty.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure battery is fully charged.</li> <li>- Follow instructions when using this product.</li> <li>- Reinstall the power connector.</li> <li>- Change battery.</li> <li>- Change electrical devices.</li> <li>- Change generator.</li> </ul>
The battery does not charge.	<ul style="list-style-type: none"> <li>- Battery connector failure.</li> <li>- Charger doesn't charge.</li> <li>- Faulty charger.</li> </ul>	<ul style="list-style-type: none"> <li>- Reinstall the connector.</li> <li>- Plug in the charger again.</li> <li>- Change the charger.</li> </ul>
The car doesn't drive far.	<ul style="list-style-type: none"> <li>- Battery isn't fully charged.</li> <li>- Overused battery.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure the battery is fully charged.</li> <li>- Change the battery.</li> </ul>
There's a slight noise and the car heats when charging.	<ul style="list-style-type: none"> <li>- This is normal.</li> </ul>	<ul style="list-style-type: none"> <li>- Nothing needs to be done.</li> </ul>
The car operates at a slow speed.	<ul style="list-style-type: none"> <li>- Overused battery.</li> <li>- The battery is dead.</li> <li>- The product has exceeded its maximum load.</li> <li>- Uneven driving surface.</li> </ul>	<ul style="list-style-type: none"> <li>- Change the battery.</li> <li>- Ensure battery is fully charged.</li> <li>- Ensure the weight is below 30 kg.</li> <li>- Drive on a flat and even surface.</li> </ul>

## Maintenance

- Before using, check the wiring, plug, shell and other parts, ensuring there is no damage.
- When using after a long time, ensure the iron castings are lubricated to avoid rust. When storing, place the product on a flat surface, ensuring it's out of direct sunlight. Keep the product indoors or cover with a water-resistant cloth.
- Keep the product away from stoves, ovens and heaters to avoid plastic from thawing.
- Clean its surface with a dry cloth. Clean plastic parts with non-wax furniture polish.
- Do not clean plastic parts with chemical solutions. Do not clean the car with water.
- Do not drive in wet weather – this could damage the generator, circuit system or battery.
- When not in use, ensure the power is off – the switch should be on 'STOP' or 'OFF'.
- Do not use a fuse that does not conform with the agreed specifications.
- Do not make any modifications to this product or circuit system. Any damages must be fixed by a professional or under the guidance of a professional.

## Wiring diagram

## Declaration

- We will not take responsibility if you change the circuit, structure or function of the vehicle.
- The diagrams in this manual are for showing the operating method and the structure of the vehicle. If there are some differences between the pictures and the real vehicles, please refer to the real vehicle.
- In order to improve the quality, we may change some parts of the structure or its appearance without notice in advance, hope you understand and support.
- This manual is very important, please take care of.
