Electronic Insect Killer

Generally most flying insects such as mosquitoes, flies etc. have positive phototaxis. Our product uses this feature to attract insects by harmless UV lights and kills them by high voltage shock.

Notice:

1. You should pay high attention to check if the voltage and frequency match this product.
2. Put the product in some place that children cannot touch, don't put the electric articles into the protective net in case of electric shock.
3. Cut off the power before cleaning this product and discharge the protective net with a screwdriver. Don't touch the electric parts of the screwdriver.
4. Don't use the product in places with high dusts, explosive or flammable materials to avoid accidents.
5. It is common when you hear crackling created by the insects when they touch the protective net.
