370-327V70

Charger specifications and operation instructions

I. Product Introduction

1. Product model: 370-327V70 (ZNL-B120100)
2. Input voltage: 100-240Vac, 50/60Hz, 0.4A;
3. Output voltage: 12VDC
4. Output current: 1000mA
5. Output power: 15W Max;
6. Protection function: Output over-current protection, Output short circuit protection.
7. Use and storage environment:
 - A. Normal operating temperature: 0°C to 25°C;
 - B. Normal use humidity: 20% to 80% RH;
 - C. Storage temperature: - 10°C to 70°C;
 - D. Storage humidity: 10% - 90% RH.

II. Instructions for Use

The series of electric adapters produced by our company, customers should pay attention to the following points when using them:

1. Check the label of the famous brand before use to confirm whether the output performance of the power adapter matches the electrical appliances.
2. The power supply voltage is consistent with the input voltage of the power adapter.
3. Under normal working conditions, the power of the electrical appliances shall not be greater than the rated output power of the power adapter.
4. Rated output power = output voltage * output current;
5. The product forbids charging non rechargeable battery
6. Please use it in dry and ventilated indoor environment, not in outdoor or humid environment.
7. For the sake of our better environment, please don't discard this product when it can't be used. Please send it to the professional recycling bin for recycling.
8. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

- 9.Children should be supervised to ensure thatthey do not play with the appliance.
10.Cleaning and user maintenance shall not be made by children without supervision.
