■ **CURA DEL PALO E MANUTENZIONE DELL'IMPIANTO:**

La vita del vostro impianto da basket dipende da molte variabili. Il clima, l'esposizione a sostanze corrosive come sale, pesticidi o diserbanti e l'uso eccessivo o improprio sono tutti elementi che possono contribuire al guasto del palo, il quale può causare danni alla proprietà o lesioni personali.

Controllare frequentemente il vostro impianto da basket per rilevare eventuali parti allentate, usura eccessiva o segni di corrosione. Per motivi di sicurezza e per prolungare la vita del vostro impianto da basket, adottare le seguenti misure preventive:

a. Controllare tutti i dadi e i bulloni. Se sono allentati, stringerli.

b. Controllare tutte le parti per verificare lo stato di usura. Se necessario, sostituire le parti usurate o danneggiate durante l'uso. Contattare il nostro servizio clienti per richiedere le parti di ricambio.

c. Ispezionare le etichette di avvertenza sul palo. Se sono strappate, sbiadite o illeggibili, contattare il nostro servizio clienti per richiedere un'etichetta sostitutiva.

d. Controllare tutte le sezioni dei pali per verificare se vi è ruggine, vernice scheggiata o incrinata. Se queste sono presenti, procedere come segue:

1. Utilizzare uno smerigliatore per rimuovere completamente la ruggine o la vernice scheggiata.

2. Pulire l'area con un panno umido e lasciarla asciugare.
