Mallet

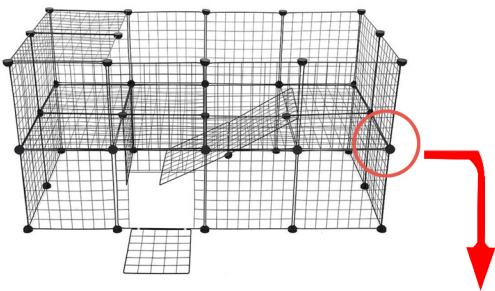

Instruction

Assembly panels and the multi-angle connectors help you to make a large and convenient space for your pets. According to your pets and room size, you can make pens of different shapes, sizes and heights to fit your needs.

1. Push panel corners into the slots of ABS connectors until there's no gap between any two adjoining panels.

2. Attach the panels into different slot position to organise the product into different struction.

3. To heighten the palypen, keep the surface of the connectors parallel to the grids.

4. Use the cable ties to bind the frames together to firm the whole structure.
